Education

San Jose State University

M.S. Computer Engineering, Concentration in AI/ML

B.S. Software Engineering

Expected: May 2029

August 2024 - May 2026

Work Experience

Technical Support Engineer

eGain Corporation

September 2026 – Present

Sunnyvale, CA

- Analyze application logs, database records, and API interactions to identify root causes and recommend solutions
- Reproduce reported issues, document findings, and provide analysis to cross-functional teams to accelerate resolution
- Manage customer issues from investigation through resolution, ensuring timely communication and stakeholder alignment
- Support a wide range of product areas including configuration, SSO, contact center solutions, and AI agent

Mathematics Tutor

Tutor Me Education

November 2024 – July 2026

San Jose, CA

- Tutored 50+ students in math and English, tracking performance data to adapt lesson plans and study strategies
- Delivered weekly progress reports to teachers and families, supporting lesson planning and early academic intervention
- Helped most students raise course grades by a full letter through consistent, personalized, data-informed tutoring sessions

Consulting Extern

PwC US Sponsored Externship – YouthBuild Global

March 2026 – June 2026

Remote

- Analyzed the client's donor data using a capacity/affinity framework, segmenting institutional funders into 5 priority groups
- Integrated AI tools into donor research workflows, validating generated outputs against primary sources before use
- Designed a donor engagement pathway across cultivation, solicitation, and stewardship to reduce lapsed-donor risk
- Presented segment-specific recommendations to development leadership under mentorship from PwC consultants

Student Consultant Intern, Finance

Open Avenues Career Pathways

February 2023 – April 2023

San Francisco, CA

- Built a 5-year financial forecasting model in Excel using three years of historical client performance data trends
- Analyzed KPIs including margin compression, cost efficiency, and risk factors to surface actionable business insights
- Developed interactive Excel dashboards and visualizations translating financial metrics into executive-ready reports

Projects & Research

Autonomous Air-Hockey Table | C++, Python, RTOS, OpenCV

September 2025 – May 2026

- Engineered an autonomous robot integrating a custom X-Y gantry, RTOS firmware, and a Linux CV stack
- Architected a Python/C++ two-process pipeline over POSIX shared memory, averaging 1.05ms puck detection
- Trained a YOLOv8 model on 1,000+ auto-labeled frames, fusing detections with a Kalman filter for stable tracking
- Achieved 93.5% puck return accuracy across 400 shots after cutting detection-to-actuation latency ~30%
- Showcased at the SJSU senior project expo, winning the AI & ML Club award as attendees lined up to play against it

Research Assistant - Building the next NVIDIA | Tableau, Linux

October 2026 – Present

- Built a full-stack student marketplace with Next.js and FastAPI, exposing 15+ OAuth-secured REST endpoints
- Designed MongoDB schemas with compound indexing and aggregation pipelines to serve dynamic, low-latency feeds
- Translated high-fidelity Figma mockups into a fully responsive interface of modular, reusable React components
- Deployed to AWS EC2 and validated every production release with automated Postman tests covering 90%+ of endpoints

Skills

Languages: Python, Java, C++, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, FastAPI, React, Next.js, Node.js, OpenCV, YOLOv8, NumPy, RTOS

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: AWS (EC2), Docker, Git/GitHub, CI/CD, Maven, Apache Tomcat, Postman, Jira, Figma
